	The lowdown:	The payoff:	Intensity:
Endurance Ride	Often the most neglected training sessions, it provides your fitness foundation and should constitute the bulk of your workouts. The Energy Zone™ includes a variety of aerobic profiles.	Perfect for higher fat metabolism and increasing your base fitness level, as well as lowering your resting HR.	65%-80% HRmax
Strength Ride	Uses high resistance and a slower cadence, you hover between aerobic and anaerobic zones, climbing some challenging mountains as you go.	A great workout for toning your legs (without building muscle size) and developing your mental and cardiovascular strength.	75%-85% HRmax
Interval Ride	A versatile workout throughout the whole spectrum of intensities, these rides alternate bursts of speed and power with recovery.	You'll increase your aerobic and anaerobic capacity, which will lead to bolstered stamina.	65%-92% HRmax
